

Job Opening – Staff Hydrogeologist/Technician Summer 2023

HRS Water Consultants, Inc. is currently accepting resumes for a full-time Staff Hydrogeologist/Technician who is passionate about solving water and environmental problems and has 0 to 2 years of professional experience. We seek self-motivated candidates with a degree in geology, geological engineering, or earth science-related field who work well independently and on teams. Our Staff Hydrogeologists are enthusiastic about performing field work and will spend a significant amount of time in the field. Experience in GIS, geochemistry, environmental chemistry, data analysis, statistics, and mathematics will be beneficial. Experience in water rights and environmental consulting will be beneficial. The ideal candidate will look forward to field work, have excellent written and oral communication skills, and have GIS experience.

The salary range for this position is \$50,000 to \$65,000 depending on education, certifications, experience, and special skills. Other benefits include health insurance, paid time off, and retirement savings consistent with the Company's existing plans and policies. Also, HRS may offer end-of-year bonuses depending on the financial performance of the company.

HRS is a small, independently owned, multi-disciplinary consulting firm established in 1981 focused on solving a variety of groundwater problems for our clients. We are leaders in water resources, hydrogeology, environmental contamination and remediation, water rights, numerical modeling, water well design and testing, and related hydrogeologic consulting services in Colorado and the Intermountain West. HRS Water Consultants, Inc. is an Equal Opportunity Employer, and we value workplace diversity.
