Laura Tobin has spent more than 25 years in the environmental consulting industry serving in various technical and leadership capacities. Laura spent 23 years with WSP through 2022, with her last position as the Vice President, Business Line Leader, Environment, Colorado. In her current role, Environmental Business Line Lead for Conti Federal Services Laura's responsibilities include development and growth of the environmental service platform through seeking new business opportunities and teaming partners, driving environmental project pursuits, and growing the environmental project delivery team nationally.

Laura Tobin

Janet Castle

Janet Castle is a PG with over 20 years of experience as a geologist, geophysicist and petrophysicist. She has developed optimized strategies for various types of sites, including Superfund, EPA, O&G, and DOD sites. She is actively engaged in the rapidly evolving world of PFAS science and regulations. Education is in geophysics and petroleum geology at University of Houston and Colorado School of Mines. Her company, Eagle Synergistic Optimizing Technologies, has a main focus to educate and assist the environmental industry with subsurface data utilizing cutting edge scientific technologies.

Beth McDonald is a PE and PG with professional experience assisting clients with real estate transactions and property development implementing skills in the environmental and hydrogeological fields often teaming with architects, civil, and geotechnical engineers to work through complex regulatory and legal framework. She currently serves as Langan's Denver Office Environmental Team Leader and is a valuable part of client teams on either side of a property acquisition in the current Colorado market. Strong relationships with and a firm understanding of the regulatory agencies in Colorado aids navigating complex environmental histories and paves the road (sometimes literally) for the future.
